# GOOD THINGS COME TO THOSE WHO WAIT

*Introducing La Cornue Château Ranges*

**JEROME'S**  
APPLIANCEGALLERY

the difference is the experience

La Cornue Château ranges are produced by artisans with care and patience. They are essentially made by hand of the finest material. The cast iron, stainless steel, solid brass, nickel, and porcelain enamel have been carefully selected in advance. Every Château range is assembled entirely by hand, from one worker from start to finish. Château ranges are only built to order. Each one is unique and you will have to wait three months before becoming the proud owner of one of these bespoke ranges which are now available at Jerome's Appliance Gallery in Calgary.
